

Maths

Purpose

To build an enthusiastic attitude towards mathematics and an appreciation of its importance and relevance in everyday life.

To develop the necessary skills and understanding of concepts that will enable students to use mathematics in a range of applications.

To develop confidence in using the language of mathematics and the ability to communicate mathematical ideas.

Guidelines

The Mathematics teaching and learning program will be developed within the framework of the Victorian Essential Learning Standards.

The Mathematics program will provide for the sequential development of mathematical skills and knowledge with an emphasis on open-ended investigation and problem solving.

A variety of approaches will be used to engage all students across a range of ability levels.

Ongoing professional development will be provided to support staff in achieving best practice in Mathematics teaching.

Evaluation

A review of the policy will take place at intervals in accordance with the Whole School Plan.
